Technology Partners

Our Services

Ten integrated practice areas delivering complete technology outcomes under one engagement.

AI and Machine Learning

- AI agents and RAG systems
- NLP and computer vision
- LLM integration
- Custom ML models
- ML Ops and governance

Application Development

- Flutter and React Native
- Native iOS and Android
- Web and SaaS platforms
- App modernisation
- Lifecycle support and QA

Cloud Computing

- AWS, Azure, GCP migration
- DevOps and CI/CD
- FinOps and cost optimisation
- Managed cloud services
- Cloud security posture

Cybersecurity

- 24x7 SOC operations
- Zero-trust architecture
- Penetration testing
- IAM and compliance
- Threat detection and response

Data and Analytics

- ETL and data pipelines
- BI dashboards
- Predictive analytics
- Data engineering
- Natural language analytics

Digital Transformation

- Strategy consulting
- Cloud-native engineering
- Intelligent automation
- App modernisation
- Process optimisation

Enterprise Solutions

- Custom ERP and CRM
- iPaaS integration
- Workflow automation
- Legacy modernisation
- Staff augmentation

Performance Marketing

- PPC and paid social
- Search engine optimisation
- CRO and A/B testing
- AI-driven attribution
- Campaign management

Industries We Serve

Healthcare

Clinical platforms, telemedicine, patient apps, EHR integration, HIPAA-aware design

Education

LMS, AI tutors, assessment platforms, school management systems

Manufacturing

IIoT platforms, predictive maintenance, computer-vision quality control

Sports and Events

Governance platforms, scoring, rankings, ticketing, event operations

IT and SaaS

Enterprise apps, SaaS platforms, API ecosystems, AI integration

Retail and FMCG

D2C platforms, omnichannel commerce, AI-driven personalisation

BFSI

Fintech apps, wealth management, compliance-aligned platforms

Media and Entertainment

OTT platforms, content recommendation, editorial systems

Startups and Enterprises

MVP delivery for founders, modernisation and AI integration for enterprise teams

Additional engagements remain confidential under NDA.

Why eCorplIT?

One Partner. Complete Lifecycle.

Strategy, design, build, deploy, secure, and operate under one engagement. You do not manage five vendors and the integration risk between them. We absorb that complexity; you receive a working product.

Industry Expertise Across India

We have delivered for organisations across healthcare, education, sports, finance, manufacturing, retail, media, and enterprise. Our practice mix maps to the operating reality of each sector.

Global Delivery from India

We work with clients across India, the United States, the United Kingdom, UAE, Australia, Canada, and Europe with real-time time-zone overlap and English-language project management throughout.

Eight Specific Commitments

NDA before any technical discussion. 100% IP and source code transfer. Milestone-based payments. Two-week sprints. Weekly demos to a live staging URL. CMMI Level 5, ISO 9001, and ISO 27001 certified.

AI and Machine Learning

Custom Agents, RAG Systems, Computer Vision,
NLP, and ML Ops

Our AI and ML Solutions

We build production-grade AI systems that solve real business problems — from intelligent agents and RAG pipelines to computer vision and ML Ops. Every system is deployed, monitored, and maintained in production.

AI Agents

- LLM-powered task agents
- Multi-agent orchestration
- Workflow automation
- Prompt engineering
- Tool-use and function calling

RAG Systems

- Retrieval-augmented generation
- Vector database integration
- Document intelligence
- Enterprise search
- Knowledge graph pipelines

Computer Vision

- Object detection and tracking
- Image classification
- Video analytics
- Quality inspection vision
- OCR and document parsing

NLP and Language

- Named entity recognition
- Sentiment analysis
- Text summarisation
- Language translation
- Chatbots and voice AI

ML Ops

- Model training pipelines
- Feature engineering
- A/B model testing
- Drift detection and retraining
- Experiment tracking

Digital Handicap and Golf Operations Platform

Indian Golf Union

The Indian Golf Union required a complete digital overhaul of its operations infrastructure including WHS handicap management, club and member workflows, scoring, and national admin systems.

Challenges

- Outdated manual handicap processes
- No unified member management system
- Fragmented scoring and results workflows
- Limited digital access for affiliated clubs

Solution

- WHS-compliant digital handicap platform
- Centralised club and member portal
- Automated scoring and rankings engine
- Role-based admin and reporting system

Results

- Fully digitised golf operations nationwide
- Unified member and club management
- Accurate real-time handicap computation
- Improved administrative efficiency

Application Development

Mobile, Web, SaaS, and Custom
Business Software

App Development Solutions

From concept to deployment, we deliver tailored, scalable, and user-friendly applications across all platforms.

Senior engineers paired with AI-assisted tooling for speed; senior architects on review for quality.

High-Scale Finance Media Platform — Next.js and Sanity CMS

Global Banking and Finance Review

A leading international finance media publication required a high-performance editorial platform capable of handling large content volumes, complex SEO requirements, and global traffic at scale.

Challenges

- Slow legacy publishing infrastructure
- Poor SEO and content discoverability
- No structured editorial workflow
- Fragile third-party integrations at scale

Solution

- Next.js and Sanity headless CMS architecture
- Schema markup and technical SEO overhaul
- Custom editorial workflow and role-based CMS
- Vercel edge deployment for global performance

Results

- Significantly faster page load times
- Improved search rankings and organic traffic
- Streamlined editorial publishing workflow
- Scalable infrastructure for global audience

E-Commerce Solutions

Scalable, Tailored E-Commerce Platforms
for Digital Growth

Our E-Commerce Solutions

E-commerce has become a cornerstone of modern businesses, enabling organisations to reach global audiences, enhance customer experiences, and drive revenue growth at scale.

Custom E-Commerce

- ✓ Headless commerce builds
- ✓ Custom storefront design
- ✓ Multi-currency support
- ✓ Product catalogue management
- ✓ SEO-first architecture

Platform Migration

- ✓ Shopify migration
- ✓ Magento to headless
- ✓ WooCommerce to custom
- ✓ Data mapping and backup
- ✓ Testing and quality assurance

B2B Portal Development

- ✓ ERP integration
- ✓ Supply chain management
- ✓ Logistics and delivery tracking
- ✓ Omnichannel enablement
- ✓ Wholesale pricing workflows

CRM Integration

- ✓ Data management
- ✓ Data syncing and reporting
- ✓ Personalisation engines
- ✓ Automated marketing campaigns
- ✓ Customer lifetime value tracking

Maintenance and Support

- ✓ API integration
- ✓ Monitoring and optimisation
- ✓ VAPT and security updates
- ✓ Compliance and regulatory updates
- ✓ Performance tuning

Multi-Specialty Medical Center Digital Platform

Reagan Medical Center

A multi-specialty medical center required a complete digital rebuild covering patient-facing applications, physician portals, and HIPAA-aligned data infrastructure.

Challenges

- No unified patient and physician digital interface
- Outdated and insecure data infrastructure
- Poor mobile experience for patients
- Non-compliant data handling practices

Solution

- HIPAA-aware patient portal and physician app
- Secure AWS cloud infrastructure
- Mobile-first responsive design system
- Encrypted data pipelines and access controls

Results

- Unified digital experience for patients and physicians
- HIPAA-compliant infrastructure in production
- Improved patient engagement and retention
- Faster appointment and records management

Healthcare

Mental Health and Wellness Technology Platform

TrustingMinds

A mental health and wellness organisation needed a platform to connect users with therapists, self-care resources, and assessment tools in a privacy-first, HIPAA-aware environment.

Challenges

- Limited accessibility to mental health resources
- Fragmented and inconsistent user experience
- Lack of real-time communication with therapists
- Serious data privacy and compliance concerns

Solution

- Personalised mental health portal and mobile app
- Unified and intuitive design system
- Real-time video and chat communication module
- Advanced encryption and HIPAA-aligned data handling

Results

- Easy accessibility to therapists and resources
- Significantly enhanced user satisfaction
- Increased platform efficiency and engagement
- Enhanced data security and user trust

Dashboard and Analytics Services

Unlock Insights, Drive Decisions —
Custom BI and Reporting Platforms

Our Dashboard Solutions

A data dashboard is an information management tool that visually tracks, analyses, and displays key performance indicators, metrics, and data points to monitor the health of a business, department, or specific process.

A. Dashboarding and Data Visualisation

Identify performance against business objectives

Highlight challenges that require immediate attention

Pinpoint actions required to resolve identified issues

Provide actionable insights and enable new discoveries

Facilitate informed decisions based on verified data

Improve business performance through better decisions

Power BI

Tableau

Grafana

B. Custom Dashboard Solutions

Aligning with Requirements

Dynamic and interactive dashboards that are feature-rich, scalable, and extensible to meet future business needs.

Metabase

Custom Dashboards

Dashboards tailored to client requirements based on specific business verticals and use cases.

BigQuery

Integrating Dashboards

Integration of dashboards into the client's current operating environment for immediate business benefit.

Snowflake

Dashboard Modification

Modification and streamlining of existing dashboards as business requirements evolve over time.

Power BI

User Training

Training non-technical users to access, interact with, modify, and maintain dashboard elements independently.

Tableau

Operations and Performance Analytics Dashboard – Solar

A solar and clean energy company needed a real-time operations dashboard to monitor plant performance, energy output, maintenance schedules, and financial reporting across multiple sites.

Challenges

- No centralised visibility across solar sites
- Manual reporting causing delayed decisions
- Lack of predictive maintenance alerts
- Difficulty tracking financial performance per site

Solution

- Real-time multi-site energy monitoring dashboard
- Automated reporting and anomaly detection
- Predictive maintenance alert engine
- Site-level financial performance tracking

Results

- Full operational visibility across all sites
- Faster and more accurate decision-making
- Reduced downtime through predictive alerts
- Improved financial reporting and profitability

Performance Marketing Services

Data-Driven Digital Marketing Solutions
for Measurable Growth

Performance Marketing Solutions

We deliver data-driven marketing solutions tailored to your business objectives. From SEO and paid social to content marketing and AI-driven performance analytics, we leverage measurable strategies to enhance brand visibility, engage your target audience, and drive real revenue.

Sports Business and Marketing Technology Platform

RN Sports Marketing

A sports business and marketing agency required a digital operations platform covering scheduling, partner communications, sponsorship workflows, and data-driven campaign reporting.

Challenges

- Fragmented operations across multiple tools
- No unified partner and sponsor dashboard
- Manual scheduling causing coordination errors
- Limited campaign performance reporting

Solution

- Custom operations and scheduling platform
- Unified partner and sponsor management portal
- Automated campaign reporting dashboard
- SEO and performance marketing integration

Results

- Streamlined operations under one platform
- Improved partner visibility and communication
- Reduced scheduling conflicts and errors
- Data-driven campaign decisions and reporting

Cloud Computing and Cybersecurity

AWS, Azure, GCP Migration, DevOps,
24x7 SOC, Zero-Trust Architecture

Cloud and Security Solutions

End-to-end cloud and security practice under one engagement — migration, DevOps, FinOps, 24x7 SOC, zero-trust architecture, and compliance alignment.

**Managed Cloud Services**

Performance optimisation

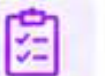

Security and compliance

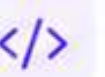

Backup and disaster recovery

Monitoring and support

SLA-backed operations

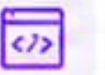

**DevOps Engineering**

DevOps maturity assessment

CI/CD pipeline automation

Containerisation and orchestration

DevOps workflows with cloud

Infrastructure as Code

**Cloud Consulting**

Workload analysis

Security posture assessment

Multi-cloud workload integration

Cloud usage monitoring

Cloud roadmap and strategy

**Cloud Migration**

Database and storage migration

Replatforming and refactoring

Server and VM migration

On-premises to cloud integration

Migration risk management

24x7 SOC Operations

Zero-Trust Architecture

Penetration Testing

IAM and Access Control

GDPR / ISO 27001 Compliance

Threat Detection

VAPT and Security Audits

DevSecOps Integration

DevSecOps Solutions

By embedding security practices into CI/CD pipelines and fostering a culture of shared responsibility, DevSecOps ensures that vulnerabilities are identified and addressed proactively, safeguarding your business from potential threats whilst accelerating innovation.

CI/CD Security Integration

Embed security checks including SAST, DAST, and SCA into every pipeline stage.

Infrastructure as Code Security

Automate configuration scanning using Terraform, AWS CloudFormation, and Ansible.

Container Security

Image vulnerability scanning and runtime protection for all containerised workloads.

Identity and Access Management

Enforce least-privilege access and secrets management across all environments.

Monitoring and Incident Response

Centralised logging with real-time threat detection using Splunk, ELK, and Datadog.

Automated Compliance

Policy enforcement and audit-ready compliance reports generated automatically.

Code Security Training

Equip engineering teams with secure coding practices and security awareness.

Zero-Trust Networking

Implement zero-trust network access to replace perimeter-based security models.

Data and Analytics

BI Dashboards, ETL Pipelines,
Predictive Analytics, Real-Time Insights

BI Dashboards

ETL Pipelines

Predictive Analytics

Real-Time Insights

Data and Analytics Solutions

We transform raw data into actionable business intelligence. From ETL pipelines and BI dashboards to predictive analytics and real-time data architecture, every solution is production-grade and built to scale.

BI and Dashboards

- ✓ Custom dashboard development
- ✓ KPI and metrics visualisation
- ✓ Power BI and Tableau integration
- ✓ Real-time reporting
- ✓ Role-based data views

Data Engineering

- ✓ ETL pipeline design and build
- ✓ Data warehouse (Snowflake, BigQuery)
- ✓ Data lake architecture
- ✓ Apache Kafka streaming
- ✓ Automated data pipelines

Predictive Analytics

- ✓ Forecasting models
- ✓ Customer segmentation
- ✓ Anomaly detection
- ✓ Demand forecasting
- ✓ Churn prediction models

Data Governance

- ✓ Data quality frameworks
- ✓ Metadata management
- ✓ GDPR-aligned data architecture
- ✓ Access control and auditing
- ✓ Data lineage and cataloging

Emerging Technologies

Revolutionary Advances
Transforming Business Operations

Emerging Tech Solutions

eCorpIT integrates AI, blockchain, IoT, AR/VR, and cloud computing into customised solutions that modernise business infrastructure and drive measurable efficiency and digital evolution.

Cybersecurity

- Firewall implementation
- Intrusion detection and prevention
- Security information and event management
- Compliance management

AR/VR Applications

- Cloud-based AR/VR
- Edge computing
- Object recognition
- Real-world interaction layers

AI and Machine Learning

- Natural language processing
- Sentiment analysis
- Computer vision
- Deep learning
- Predictive analytics

IoT Application Development

- Smart home automation
- Wearable device integration
- Predictive maintenance
- Fleet management
- Smart parking solutions

Blockchain

- Storage and data solutions
- Infrastructure as a Service
- Smart contract development
- Blockchain integration services

IT Consulting Solutions

IT Consulting to Drive Innovation,
Efficiency, and Growth

IT Consulting

Driving transformation. Delivering value.

Digital Transformation Consulting

Analyse challenges and develop a fitting IT strategy.

Software Modernisation

Assess legacy software and offer modernisation to cut costs.

Software Consulting

Address software-related blockers to avoid costly mistakes.

Custom Software Development

Build from scratch with maintainable code and documentation.

Cloud Enablement

Leverage cloud for scalability, security, and cost savings.

Start

- Analyse business processes, requirements, and objectives
- Build technology roadmap to drive the right decisions
- Ad-hoc training to help you achieve your target

Scale

- Research on increasing complexity of business requirements
- Discover unique financial and operational capabilities
- Identify growth scenarios and opportunities

Disrupt

Start a conversation and turn your vision into reality.

- Flexible short-term and long-term partnership models
- Continuous upgradation and improvement of systems
- Optimisation of infrastructure with emerging technologies

Digital Transformation Services

Empowering Businesses to Innovate and Thrive in the Digital Era

Digital Transformation

Our digital transformation solutions help organisations innovate, optimise processes, and create agile, customer-centric operating models. We leverage cutting-edge technologies to streamline operations, enhance customer experiences, and drive growth in the digital age.

Automotive

- Connected vehicles
- Autonomous vehicles
- Fleet management

Retail

- AI-driven recommendations
- Chatbots for support
- Inventory management

Manufacturing

- Digital twin
- Supply chain visibility
- Predictive maintenance

Education

- LMS platforms
- AI personalised learning
- AR/VR learning tools

Banking and Finance

- Digital wallets
- Blockchain transactions
- Fraud detection

Cloud Integration

Migrate services to cloud for scalability and cost flexibility.

Data Analytics

Utilise advanced analytics for informed, data-driven decisions.

Automation Tools

Implement automation to streamline workflows and increase efficiency.

Customer Experience

Enhance user experience with personalised digital engagement.

Cybersecurity Measures

Strengthen security protocols against digital threats effectively.

QA and Testing Services

Empowering Businesses to
Ship with Confidence

Testing Services and Solutions

To ensure your software functions as intended, we offer a comprehensive approach to identify defects, verify performance, and validate usability. Our team focuses on delivering reliable, secure, and high-performing software that meets your business objectives and ensures a seamless user experience across all environments.

Functional Testing

- Unit testing
- Integration testing
- System testing

Non-Functional Testing

- Load testing
- Security testing
- Usability testing

Regression Testing

- Ensures new code changes do not affect existing functionality
- Automated regression suites for fast feedback

Smoke Testing

- Quick checks to confirm the most critical functions work before full test cycles begin
- Pre-deployment gatekeeping

User Acceptance Testing

- Confirms the software meets business requirements and real user needs before launch
- Sign-off before production deployment

Engagement Models and Pricing

Six Models, Real Numbers,
Milestone-Based Payments

Engagement Models

Staff augmentation is not offered. Every model below represents an outcome we take full responsibility for delivering.

01

Discovery and Prototype Sprint

Best for: First engagement or AI concept validation

2 to 4 weeks

Flat fixed fee

02

Fixed-Scope Project

Best for: Clearly defined software or infrastructure builds

4 to 16 weeks

Fixed + milestones

03

Dedicated Product Pod

Best for: Ongoing product development teams

Ongoing

Monthly retainer

04

Long-Term Product Partnership

Best for: Category-defining products and platforms

6+ months

Retainer + outcome

05

Managed Services

Best for: 24x7 cloud, SOC, NOC, and app support

Always-on

Monthly + SLA

06

Fractional CTO and Engineering Pod

Best for: Early-stage founders needing technical leadership

3+ months

Monthly retainer

Eight Specific Commitments. Demonstrable Practices.

01

**One Partner.
Complete Lifecycle.**

Strategy, design, build, deploy, secure, and operate under one engagement.

02

**Outcomes, Not
Developer Placements.**

We deliver complete project engagements. We are not a body shop.

03

**NDA Before Any
Technical Discussion.**

Every potential client signs a mutual NDA before we receive specs or architecture details.

04

**100% IP and Code
Transfer.**

Source code, designs, AI models, and documentation are fully owned by you from day one.

05

**Sprint-Based Delivery
with Weekly Demos.**

Two-week sprints, with a working build deployed to a live staging URL every sprint.

06

**Milestone-Based
Payments.**

You pay as we deliver. Not a single lump sum upfront. Aligned incentives.

07

**Team Continuity
Built In.**

Practice-area leads, review boards, and documented playbooks mean delivery does not depend on any single person.

08

**Audited Security.
Certified Processes.**

ISO 27001, ISO 9001, CMMI Level 5 — independently audited every year. Not a badge on a slide.

The Stack We Build On, **Named Explicitly**

Eight technology groups. Picked per engagement, not per fad. Selection depends on your existing systems, scale, compliance requirements, and team.

AI and ML

OpenAI, Anthropic Claude, Google Gemini, Meta Llama, Mistral, Hugging Face, LangChain, On-Prem LLMs

Mobile

Flutter, React Native, Swift / iOS, Kotlin / Android, Expo

Web and Frontend

Next.js, React, Astro, Vue, Nuxt, Sanity, Tailwind CSS

Backend

Node.js, Python, FastAPI, Go, Java, Spring, GraphQL, REST

Data

PostgreSQL, MySQL, MongoDB, Redis, ClickHouse, BigQuery, Snowflake

Cloud and DevOps

AWS, Azure, GCP, Docker, Kubernetes, Terraform, GitHub Actions

Tools

GitHub, GitLab, Slack, Linear, Jira, Figma, Notion

Security

Cloudflare, Auth0, Okta, Snyk, HashiCorp Vault, OWASP, Zero-Trust

Certifications and Credentials

Nine Independent Credentials —
Maintained, Not Collected

Nine Independent Credentials

Independently audited and maintained across quality, information security, IT service management, workplace safety, and regulatory compliance.

CMMI Level 5

Highest development maturity. Continuous process improvement and quantitative management.

ISO 9001:2015

Quality Management System. Internationally recognised standard for process and quality discipline.

ISO/IEC 27001:2022

Information Security Management. Client data protection, annually audited.

ISO/IEC 20000-1:2018

IT Service Management. Service design, delivery, and continual improvement.

ISO 45001:2018

Occupational Health and Safety. Safe and healthy workplaces standard.

D-U-N-S Registered

Number 854367803. Used by enterprise procurement and global supply-chain due diligence.

GDPR Compliant

Designed-in handling of EU personal data in line with European data protection regulation.

DPIIT Recognised

Startup India recognition under the Department for Promotion of Industry and Internal Trade.

MSME Certified

Registered with the Ministry of Micro, Small and Medium Enterprises, Government of India.

Technology Partners

Working partnerships across cloud, security, productivity, and e-commerce — applied directly in client engagements, not just badge collection.

AWS

Cloud architecture, migration, and managed services on Amazon Web Services.

Microsoft

Azure, Windows Server, and enterprise solutions across the Microsoft stack.

Google

Google Cloud, Workspace, and Ads across cloud and performance marketing.

OpenAI

GPT-class models for agents, copilots, automation, and bespoke AI workflows.

Vercel

Frontend delivery network and Next.js hosting for production-grade web platforms.

Sanity

Headless CMS and structured content for editor-led marketing and product teams.

GitHub

Source control, Actions CI/CD, and Copilot — the engineering OS for every project.

MongoDB

Document database and Atlas managed clusters for scale-out data workloads.

Shopify

E-commerce platform development, theme engineering, and Hydrogen headless builds.

Kaspersky

Endpoint security, threat protection, and managed cybersecurity services.

Adobe

Creative Cloud, Experience Manager, and design tooling for content and CX teams.

Deskt ime

Time tracking, productivity analytics, and remote-work visibility.

Five Steps. No Surprises.

STEP 01

01

Discovery

Free 30-minute call. Within 5 working days you receive a one-page strategy doc, architecture sketch, and indicative cost and timeline. No commitment required.

Strategy doc delivered

STEP 02

02

Design Sprint

Senior designers in a structured sprint. You approve clickable Figma prototypes before code begins. Saves budget, removes ambiguity, and locks scope.

Clickable Figma prototype

STEP 03

03

Build

Two-week sprints with weekly demos. Senior engineers with AI-assisted tooling for speed; senior architects on review for quality. Every sprint ends with a live staging URL.

Live staging URL per sprint

STEP 04

04

QA and Security

Automated test suites, security review, performance testing, and WCAG 2.2 accessibility audit. We do not ship before this step is signed off.

WCAG 2.2 + security sign-off

STEP 05

05

Launch and Support

App Store, Play Store, or cloud deployment. After launch we transition into managed engineering with SLA-backed support and monthly roadmap reviews.

SLA + monthly reviews

Client Testimonials

INDIAN GOLF UNION

"The eCorplT team delivered a fully working WHS handicap system within the agreed timeline. Their project management was transparent and their technical expertise was evident throughout every sprint demo."

CEO, Sports Federation

GLOBAL BANKING AND FINANCE

"eCorplT transformed our editorial infrastructure. The new Next.js and Sanity platform loads significantly faster and our editorial team loves the workflow. We saw a measurable improvement in organic traffic within weeks of launch."

Head of Digital, Finance Media

TRUSTING MINDS

"Working with eCorplT was straightforward and professional. They were honest and easy to do business with. Their team understood our HIPAA requirements immediately and delivered an architecture we trust completely."

Director, Healthcare Platform

THANK YOU
